## **Smoke and Mirrors**

## (srorrim dna ekoms)

For multi percussion & digital audio

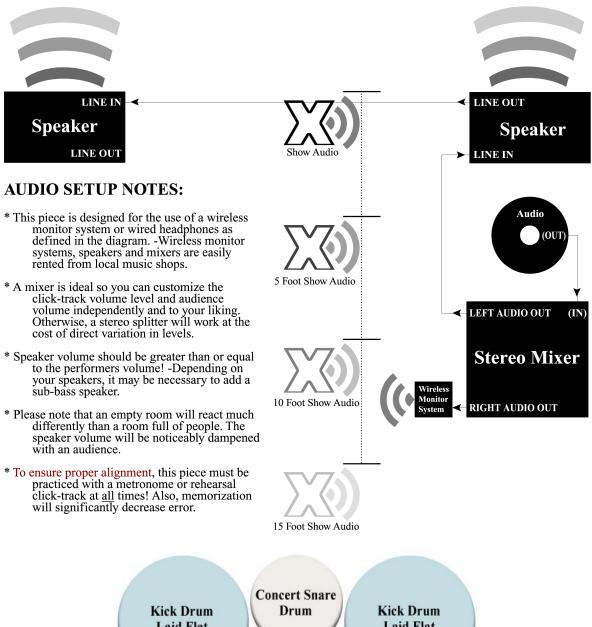

**Dustin R. Lowes** 

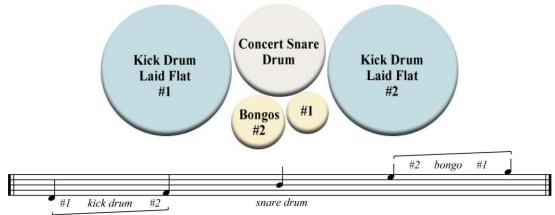

**Smoke and Mirrors**, in its most generic sense, is as such: The soloist performs the Mirrors, and the CD Audio plays the Smoke.

The *Mirrors* / soloist portion consists of many rhythmic "mirrors," also known as a rhythmic palindrome. Many times throughout, the performer will have portions of a measure or phrase that will completely flip its self backwards.

~Now for the fun part. Once the soloist performer reaches the two minute mark, the entire score of music hits the last mirror, sending the performer all the way back to the beginning, note-for-note, backwards.

The *Smoke* / CD audio portion has only one job: to disguise the Mirrors. The listener should never know that the mirrors are even happening.

## **NOTATION:**

- \* A marcato ( ^ ) accent always means rim shot.
- \* E, 1/2, and C indicate Edge, Halfway, and Center
- \* A slashed note suggests a diddled sticking (RR/LL).
- \* Dynamic markings separated by a slash (/) indicate accented and non accented notes.
  -All dynamics stay constant until a new one is introduced.
- \* Staccato ( . ) notes represent a dead/flat sound, whereas a tenudo ( ) mark represents the most tone.
- \* ( // ) Following a note indicates a choke: stopping the sound produced immediately following the attack.
